

SECRET

24 November 1954

TO: Chief of Logistics  
FROM: Chief, Planning Staff, LO  
SUBJECT: Weekly Report for the Period 18 through 24 November

1. PROJECTS AND STUDIES IN PROCESS:

a. Strategic Reserve Requirements (continued)

(1) Small Arms Resolution of the caliber [REDACTED] 25X1C  
strategic reserve question is still pending.

(2) Water-borne Delivery Initiated study of materiel re-  
quirements for water-borne delivery.

b. Agency Regulation No. [REDACTED] (continued) 25X1A

*Has not yet  
been referred  
to TRAP  
for review.*

The proposed Agency Regulation No. [REDACTED] which prescribes 25X1A  
Agency policy, responsibility and procedure for logistic planning has  
been approved informally by the Chief of Logistics. The proposed  
regulation has been modified to assign to the Logistics Office, the  
responsibility for the preparation of logistic annexes and to assign to  
the major components of the Agency, the responsibility for furnishing  
the Chief of Logistics the operational data requisite to the development  
of logistic annexes. It is proposed that logistic annexes will serve  
the Agency as a basis for budget estimates on materiel, facilities and  
services.

2. OTHER ITEMS OF INTEREST: (All items are of a non-recurring  
nature.)

c. Resistance Support Work Group

*About time!*  
A Group, consisting of representative of [REDACTED] Division, Psychological-Paramilitary Staff/DD/P; DD/P/Admin, War Plans Division/PPC/DD/P; Assistant Director of Communications; and members of this Staff, has been established to obtain the best current estimates of world-wide resistance potential, and a delineation of specific organization concepts and equipment in support of the resistance potential by surveying the Area Divisions of DD/P. The Group is under the chairmanship of a member of the PP Staff.

*Setup to study & review force strengths - chaired by PP Staff - 20*  
d. WE

(1) Assisted in working out necessary details in connection with procurement of various items, which the Agency will procure for an agent and receive reimbursement.

(2) Coordinated necessary action with the Supply and Transportation Division to expedite purchase and effect shipment of television sets in time to meet an operational deadline of 6 December in the field.

e. SR

25X1C10b

f. WH

25X1A11a

Expedited the handling and processing of a "crash" operational requirement for delivery of a [REDACTED] receiver to the Division Logistics Office. An employee of the division was to take the equipment, as unaccompanied baggage, the evening of the day the requisition was initiated.

g. EE

25X1C10b

Action was initiated on an inquiry from the area division to ascertain the types and availability of [REDACTED] necessary to fulfill

**CONFIDENTIAL**

EE (continuation)

an operational requirement from the field. The possibility of releasing a U. S. type [REDACTED] must also be determined.

h. SE

Continued the coordination necessary to assist the area division in determining the action undertaken by the Procurement Division, LO, in procuring various items for projects under the control of Staff "D".

i. Air-Maritime

Obtained from U.S. Navy sources the cost of helium per cubic foot, the transportation charges for the shipment of helium cylinders from the United States to a designated point overseas, as well as, the return of empty cylinders to the ZI, and the normal lead time necessary for procurement of helium and cylinders.

j. Office of Communications

A study is being made on the development of a set of standards to provide completeness and uniformity in Agency engineering drawings and specifications for procurement purposes. As a large portion of Agency procurement is effected under Armed Forces Procurement Instructions, the Department of Defense drawing and specifications standards are being used as a guide.
